## FROM THE SIMPLE TO THE COMPLEX: ARC EUROPE TRANSFORMS DATA MANAGEMENT FOR REPORTING AT THE SPEED OF THE BUSINESS

### What was the context in which you implemented CCH Tagetik?

*CCH Tagetik represented the start of a new group reporting phase. Part of our business is insurance, and in that sense, we have to take into consideration regulatory factors. We have different challenges in the process of planning in our organization because the dimensions of the group companies are quite different, so some of them are very simple, some of them are very complex.*

*CCH Tagetik gave us the ability to handle both: all the finance processes of the group are run in the system. It was unique because it gives us standardization but at the same time flexibility.*

### How has use of data evolved?

*We now have a unique data source and a unique repository of all the group's financial data, the main benefit of which is, first of all, the security of this data. Having a Cloud solution enables us to have constant support and we can benefit quickly from innovation in the systems. We have implemented a full set of metrics in CCH Tagetik, and those metrics are now the basis of the KPIs we use in the system.*

### What has been the main positive impact?

*The biggest positive impact is the fact that everybody is on the same page following a common process. One of the biggest challenges is to be able to move the financial reporting at the same speed as the business, so for us having a flexible solution is one of the key priorities.*

### Would you recommend CCH Tagetik to other CFOs?

*I would recommend CCH Tagetik to any CFO who would like to start a new phase in reporting and planning.*

ILARIA CAPUTO  
Chief Finance & Insurance Officer, ARC Europe Group

ARC EUROPE uses CCH Tagetik for Consolidation and Budgeting & Planning.
