MAKING COMPLEX CONSOLIDATION SIMPLE: HOW ERSTE
STREAMLINED CONSOLIDATION ACROSS 400 ENTITIES

How did you manage your consolidation process before CCH Tagetik?
“We were using an SAP solution. It was very difficult to adapt the system to change. You certainly
couldn’t do it by yourself. Any new configurations or developments were very complicated.
Since we began using CCH Tagetik, the way we work has drastically changed. CCH Tagetik
prompts you to have very streamlined data processing, a streamlined data collection, and a
streamlined consolidation. They’re not trying to sell you something complicated. They really
try to keep it simple!”

What set CCH Tagetik apart from other vendors?
“First, CCH Tagetik makes data available. From a time perspective, the system prepares our
data much faster — we gained more than 50% of our time back. It’s very easy to get data
ready for analysis and use in reports.
Some solutions would have you create a new project for every new report. In CCH Tagetik, you
learn how to design a report and then simply do the next one by yourself.
In the end, we chose CCH Tagetik for its capabilities, flexibility, and the personal factor: it’s a
consultancy approach to customer service. CCH Tagetik’s team learns from you; we learn from
them. It’s very cooperative. You have confidence that they will always grow with you.”

Now that you have implemented CCH Tagetik, how do you use it?
“We are currently consolidating around 400 entities. As you can imagine, as a multinational
group, we have many different legacy systems with just as many interfaces. CCH Tagetik’s
advantage is that it provides users with a very simple interface.”

How does CCH Tagetik benefit you and your team?
“The most significant value add was in our consolidation process. From data collection to regulatory
and investor reporting, and everything in between — including validation, consolidation, and
postings — using CCH Tagetik, our process is almost entirely independent.
The solution really does manage all processes from A to Z. It’s so integrated that whenever you
have a new requirement — in data collection or in the data reporting — CCH Tagetik adapts.
For example, now we’re facing iXBRL reporting. Everyone who is stock listed in Europe will
need to report in this format. CCH Tagetik has developed the product to accommodate iXBRL.
They’ve grown with us — as they have in the past — and that’s a huge advantage.”
