

Company Info

Natixis is a French multinational financial services firm specialized in asset & wealth management, corporate & investment banking, insurance and payments.

“One of the key benefits is to win time. Previously we spent more or less 60 percent of our time to produce the data. With CCH Tagetik it’s a fraction of that.”

NATIXIS SUBSIDIARY BPCE NEEDED DATA CONFIDENCE. REPLACING MANUAL PROCESSES WITH CCH TAGETIK, BPCE IS SURE OF ITS DATA AND SAVING MUCH TIME TO PRODUCE IT

What challenges caused you to review your financial systems?

I work in the Natixis subsidiary BPCE Financement. We always have new challenges especially with the digital environment. As a management controller in the office of finance, my colleagues and I have to help the financial management to access the right strategic goals and propose the best answers at the ideal moment. We have to avoid wasting time, especially for quarterly and annual reporting. Before CCH Tagetik we were using Excel and Access. It’s was a manual process, and we could make mistakes.

What were you looking for in your new solution?

We wanted a software to be more efficient. CCH Tagetik, I think, offers new opportunities to manipulate data. It’s easier to share the same data in the company.

What benefits did CCH Tagetik bring?

One of the key benefits is to win time. Previously we spent more or less 60 percent of our time to produce the data. With CCH Tagetik it’s a fraction of that. And a second benefit is to share the same data, the same reporting. Also we can use financial or non-financial data. It gives us a kind of confidence. We are sure about what we are communicating.

AMINE KORBI
Controller, Natixis
